KHUSHI GUPTA

Software Engineer | Backend & APIs | Python • Java • SQL

Open to Relocate — Bangalore / Hyderabad / Pune | +91-9456109398 | khushiiigupta23@gmail.com | linkedin.com/in/khushi-gupta | github.com/Khushiguptaaaaa

PROFESSIONAL SUMMARY

Computer Science graduate (Completed, April 2026) with hands-on experience in backend API development, high-volume data pipelines, and systems programming. Built production-grade REST services in Python, processed 1M+ records with PySpark, and published peer-reviewed AI research at NIT Uttarakhand (ICCEE 2026). Seeking an entry-level Software Engineer role — open to immediate relocation.

TECHNICAL SKILLS

Languages:	Python, Java, C++, SQL, Bash
Backend & APIs:	RESTful APIs, FastAPI, Flask, PostgreSQL, MySQL, SQLite
Core CS Concepts:	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Data & ML Libs:	PySpark, NumPy, Pandas, OpenCV, TensorFlow, Scikit-Learn
Tools & DevOps:	Git, GitHub, Linux/Unix, Postman, VS Code, SIEM Log Analysis

RESEARCH & PUBLICATION

AI Biometric Authentication with Liveness Detection

Python, TensorFlow, OpenCV, ResNet50 — NIT Uttarakhand | May 2026

Published & Presented at 4th International Conference on Computer & Electrical Engineering (ICCEE 2026)

- Architected an anti-spoofing facial recognition pipeline using ResNet50 transfer learning — achieved 96% classification accuracy on print and video replay attack benchmarks.
- Optimised image preprocessing and model inference to maintain real-time latency under 200ms on consumer-grade CPU hardware.

TECHNICAL PROJECTS

Secure Authentication & Verification Microservice

Python, FastAPI, SQLite, SMTP — 2024

- Engineered a modular REST backend supporting user registration, salted bcrypt password hashing, and token-based session management.
- Implemented OTP delivery over SMTP with rate-limiting (3-attempt cap) and 5-minute TTL expiry to prevent brute-force attacks.
- Designed and documented REST endpoints in Postman with payload validation and structured error handling for malformed requests.

High-Volume Sales Data Pipeline & Query Engine

PySpark, PostgreSQL, Python, SQL — 2025

- Built an automated ETL pipeline in PySpark to process, clean, and load 1,000,000+ transactional records into PostgreSQL.
- Authored optimised SQL queries using CTEs, Window Functions, and indexed multi-table JOINs — reduced report runtime by 30%.
- Designed normalised database schemas with index constraints to maintain ACID compliance during bulk batch loads.

EXPERIENCE & INTERNSHIPS

Software Developer Intern — AgentBlazer Program (Salesforce)

2025

- Built automated backend workflows and data validation pipelines using Apex triggers and structured SOQL queries across relational schema objects.
- Identified and resolved 15 functional defects during unit and integration testing, ensuring data consistency across transactional records.

Cybersecurity Intern — Acmegrade

Jul 2024 – Aug 2024

- Monitored and parsed 1,000+ security event logs using SIEM tools to detect anomalous traffic patterns and unauthorised access attempts.
- Conducted vulnerability assessments across 20 simulated environments on TryHackMe, documenting misconfigurations and exposed service ports.

EDUCATION

DIT University — B.Tech in Computer Science & Engineering
Dehradun, India | 2022 – 2026 (Completed, April 2026)

Relevant Coursework: Data Structures & Algorithms, OOP, Database Management Systems, Operating Systems, Computer Networks

CERTIFICATIONS & ACHIEVEMENTS

- 1st Place Winner: Tata Building India State-Level Competition (among 50+ participants).
- Microsoft Certified: Security Tools & Threat Management Fundamentals (2025).
- IBM Certified: Generative AI Architecture & Application Fundamentals (2026).
